

Victim Proximity Solution

For DV and other Victim Related Cases

Buddi's proven Domestic Abuse monitoring solution provides complete reliability to Authorities, reassurance to victims, and ensures offenders are tracked and monitored 24/7.

- + Use with Smart Tag® or AlcoTag™
- + Dynamic Zones for Victim Alerts
- + Optional Distress Call
- + Doesn't affect Victim's Phone battery

A large green circle graphic is positioned in the bottom right corner of the slide. Inside the circle, there are two white slanted bars above the text "Discrete & Effective".

Why Buddi?

Create moving zones around the Victim and the offender. If they come into contact anywhere, the victim can be notified and make informed decisions about their next move.

Offender control

Offender Management and monitoring using zone restrictions and alerts.

Live tracking delivers 100% locations with no data gaps through multiple combined technologies, networks and a dual SIM.

Proximity monitoring

Mobile personal protection using Buddi's paired victim device.

Personalized solution with optional alerts, two-way communication and discreet dial.

Victim confidence

A range of well-established stand-alone solutions honed for reliability and discretion.

Supports deterrence and urgent responder action.

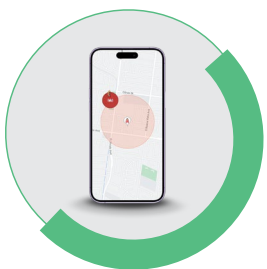

Buddi Smart Tag®

- Integrated location monitoring device with RF, GPS, GSM and Wi-Fi technologies.
- Dual roaming SIMs compatible with 2G, 3G, 4G and LTE networks.
- Robust with secure strap, including multi-tamperproof features.
- Long lasting battery life, 3-5 days in normal use.
- Simple and secure install/removal in under one minute.

Buddi Clip

- Has a speaker and a microphone, enabling two-way communication with the victim.
- Has a panic button and can vibrate to alert the victim if the proximity rule is breached.
- Has around 36 hours of battery life.
- A small and discreet product, the Buddi Clip fits in the pocket or can be attached to a lanyard or keyring.
- Designed in subtle colors and style.

Alerts

- High risk alerts can be reported immediately, despite the configured reporting profile applied.
- Once reported, the alert will instantly be presented to the monitoring operative who can then escalate appropriately.
- The system can also send auto text messages to a victim to advise of a specified zone breach, so that they can protect themselves whilst escalation responses are being actioned by staff.

Software/ System

- Buddi's software platform Eagle is an intuitive, user friendly, web-based monitoring software.
- The software is simple to set up.
- System security – ISO27001 accredited and Cyber Essentials Plus certified.
